Quality Assurance Coordinator Registration/Designation Form

All Agencies conducting Rapid HIV Testing in Louisiana must designate and register a Quality Assurance Coordinator. The Quality Assurance Coordinator should be a person with significant experience conducting rapid testing (6 months experience and a minimum of 200 rapid tests conducted) and familiar with storage and operating procedures/requirements of the rapid testing device(s) used at their agency.

<u>Submit to SHP immediately whenever the designated Quality Assurance Coordinator changes or when updates/changes to his/her contact information occur.</u>

Fax completed form to (504) 568-7044 Attention CTR Supervisor

Steps to HIV Counseling and Testing Certification

Steps for Obtaining a Counselor Number:

- 1. Attend a combined HIV Prevention Counseling and Rapid Testing course in its entirety and leave with a certificate of participation.
- 2. After completing the HIV Prevention Counseling and Rapid Testing training and receiving a certificate of completion, there are two additional steps. First, a written test covering HIV prevention counseling, rapid testing skills, and protocol/paperwork must be passed. The dates, locations, and method of signing up for a class are outlined on www.hiv411.org. Secondly, all persons conducting CRT must successfully complete an observation session with the Regional Prevention Coordinator or other SHP Prevention staff as arranged by the Prevention Coordinator. Each person has two opportunities to pass the written test and the counselor observation. If the person fails either the test or the observation twice, they must go through the entire process again, beginning with training. Also, the written test must be passed before the observation can be scheduled.
- 3. Once the SHP Training Coordinator assigns a unique counselor number to the counselor, they are fully certified and may conduct CRT.

Steps for Registering a Rapid Testing Site:

- 1. Regional HIV Coordinator must conduct a site visit and make their recommendation on the site assessment and registration form. This form will then be given to the CT Supervisor.
- 2. If the site is favorably observed, CT Supervisor will assign a site number and mail a certificate with this number on it. A copy of this certificate must be kept on the site premises at all times.

Please Note: Meeting all counselor requirements does not automatically qualify your agency for site approval. Meeting all site requirements does not automatically qualify your agency for funding or free testing materials.

Louisiana HIV Prevention Counseling and Rapid Testing Service Delivery Model

The following steps apply to testing with OraQuick, Clearview, and Uni-Gold when used as the first rapid test. *For those using INSTI as the first rapid test, collect the specimen and run that test after #3a below.

Step 1a - Introduce and Orient the Client to the Session

- Introduce yourself to the client.
- Assess client's readiness to receive the results on the same day.
- Offer options for testing (conventional or rapid).
- Describe the testing process, what type of specimen will be collected, how long the whole process will take, and what each of the three possible results mean.
- Explain to client that if a preliminary positive result is received, a second rapid test will be conducted.
- Address Partner Services, including informing the client that if results come back positive, a DIS will contact
 them to offer additional services.
- Offer anonymous and confidential options, and explain what each mean.
- Obtain Informed Consent.
- Provide appropriate subject information pamphlet for the rapid test being conducted.

Step 1b – Administer the Rapid Test

- Follow applicable universal precautions
- Clearly label the test device being used
- Demonstrate/facilitate specimen collection
- Start Timer

Step 2 – Identify Risk Behaviors and Circumstances

- Engage client in a discussion of risk behavior
- Assess client's previous experience with HIV testing and knowledge about HIV/AIDS
- Complete all but results section of HIV Test Form-Part 1

Step 3a – Identify Safer Goal Behaviors

- Give client information on relevant risk and harm reduction strategies
- Use relevant information pamphlets, brochures and/or brief videos
- Have client explain what he/she can do to reduce risk
- Assess client readiness to receive results can continue up until the timer goes off
- Allow time for client to process and respond

Step 3b – Interpret and Deliver the Test Result (after appropriate time as elapsed)

- Follow applicable universal precautions for handling rapid testing materials
- Interpret Test Result (use a second reviewer if needed and client is not present)
- Return to client and give the results immediately in a simple and direct fashion
- Allow time for client to process and respond

Step 4 – Develop Risk Reduction/Action Plan (can be initiated prior to delivery of test results but should be modified, as needed, after results are provided)

- Based on the results of the test and the client's risk profile, assist the client in developing an action plan to further protect their health and the health of their partners.
- Document risk reduction plan in client's file

Step 5 – Offer Referrals and Provide Support (can be initiated prior to delivery of test results but should be modified, as needed, after results are provided)

• Make appropriate referrals and negotiate plans to follow up with the client

Step 6 – Summarize and Close the Session

Risk Reduction Worksheet

Thank you for participating in our HIV testing program. If you received a **negative** test result that means the test did not detect any HIV antibodies in your body. Antibodies can take up to 3 months to develop if you've been exposed to HIV, so it's important that you know that you could still be infected with HIV even if you tested negative today, especially if you've been exposed in the last 3 months and your body hasn't developed antibodies yet. So get tested regularly, and at least 3 months after having unprotected sex, injecting drugs, or practicing any other behaviors that could put you at risk for HIV, including coming into contact with any of the 4 bodily fluids that HIV can be transmitted through - blood, semen, vaginal fluid, and breast milk.

If you tested preliminary positive that means HIV antibodies were detected by the test, and a second rapid test is needed to determine if you need to see a doctor. Please see a medical doctor to learn the best ways to treat the HIV infection; your counselor will help you determine where you might go for medical treatment and can tell you about other types of support available in your area.

During your counseling session today, we talked about behaviors that may put you at risk for HIV and other STDs, and ways to reduce those risks. Below is a summary of your counseling session.

| <u>Behaviors</u> | Action Steps to Reduce Risk | <u>Time Frame</u> |
|--|-----------------------------|-------------------|
| ○ Having Anal Sex | | |
| ○ w/ condom | | |
| w/out condom | | |
| O wy out condom | | |
| Having Vaginal Sex | | |
